All artwork in this exhibition is made by students who took courses in The Built Surface with CS instructor Jeanne Krabbendam. These courses explore usual and less usual art materials and techniques to create narrative and exciting, meaningful configurations. This exhibition is a tribute to students and their art. What is shown here represents only a small percentage of what has been created over the last years. It will give the viewer a 'taste' of what is possible and what it looks like when artists start to build their surface.
